PROFESSIONAL SUMMARY

Gen AI Developer and product builder focused on designing and deploying real-world AI systems that replace traditional workflows. Experienced in building scalable AI applications across chatbots, automation platforms, and intelligent systems with strong emphasis on usability, performance, and deployment.

CORE COMPETENCIES

- **Programming:** Python, JavaScript, Java, SQL
- **AI Systems:** Machine Learning, NLP, Computer Vision, AI Pipelines
- **Frameworks:** MediaPipe, OpenCV, React.js
- **Tools:** Git, VS Code, Jupyter Notebook
- **Strengths:** Product Thinking, Problem Solving, System Design

AI PRODUCTS & PLATFORMS

AI Resume Builder

resume.vanshrajput.in

- Built an AI-driven resume generator producing ATS-optimized resumes within seconds.
- Designed intelligent content structuring based on user input analysis.

Xenza AI (In Development)

xenza.in

- Developing a unified AI ecosystem integrating multiple advanced tools in one platform.
- Focused on scalability, modular architecture, and real-world applications.

AI Vansh — Conversational AI

ai.vanshrajput.in

- Developed a human-like desi conversational AI with natural interaction flow.
- Optimized for contextual understanding and engaging responses.

FlowSense AI — Crowd Intelligence System

flowsense.vanshrajput.in

- Designed AI-powered crowd monitoring system for large-scale environments.
- Focus on security, analytics, and real-time decision support.

AI Biometric Attendance System

attendu.hackthefuture.in

- Built a fully AI-based attendance system eliminating hardware dependency.
- Enables intelligent identity verification and automation.

Developer Tools Ecosystem

- **Online Compiler:** compiler.hackthefuture.in
- **Online IDE:** dev.hackthefuture.in
- **AI DSA Platform:** dsa.hackthefuture.in
